

METAL INDUSTRY SOLUTIONS

With more than 60 years of experience, the Samuel Packaging Systems Group, a division of Samuel, Son & Co., Limited, is pleased to be a single-source supplier, offering a range of products, parts, tools, equipment and services to support tube manufacturers, long product manufacturers, steel service centers and steel mills.

Innovation and Investment

As a company that's been around for more than 170 years, Samuel understands the importance of innovation.

ADVANCING WITH AUTOMATION

We're improving product quality and shortening lead times with automation.

- Our facility in Heath, OH features custom automation for steel strapping coil production.
- Our Fort Mill, SC facility features an automated pack-out process for plastic strapping coils.

ELITE DESIGN—DELIVERING THE LOWEST TOTAL COST

In-house North American team of mechanical and electrical engineers with decades of experience who can help:

- Create custom-engineered packaging equipment, designed, fabricated and assembled in-house.
- Turn-key integrated handling, packaging and advanced automation solutions that can be integrated seamlessly with existing.

POWERFUL PRODUCTS

We're committed to continuously improving our products so our customers can benefit from the latest technology.
